Dynamic PYQ Topics

Rank 1

Asked 1 time

Years: 2024

Topic: Draw Transition Diagrams

Draw transition diagrams to represent the following (i)relational operators (ii)identifiers.

Rank 2

Asked 1 time

Years: 2024

Topic: Input Buffering

Write a note on input buffering with necessary diagrams. Specify (S) the advantages of using two buffer system and sentinels in input buffering.

Rank 3

Asked 1 time

Years: 2024

Topic: Four Compiler Construction

Explain any four compiler construction tools.

Rank 4

Topic: First Follow

Write the recursive descent parsing procedure for the following grammar. $S \rightarrow iCtSS' \mid a \mid S' \rightarrow eS \mid c \rightarrow b$ OR Write algorithms for finding FIRST and FOLLOW sets. What is the role of FIRST and FOLLOW in a predictive parser?.
b) Compute the FIRST and FOLLOW sets for the non terminals in, the following Grammar $I' \rightarrow S \rightarrow ADBIDbBIBa \mid A \rightarrow da \mid B \rightarrow glt \mid D \rightarrow hlt$ Construct SLR parsing table for the following grammar. Check if the grammar is SLR or not. Justify Your answer. $E \rightarrow T \mid +E \mid T F \rightarrow id$

Topic: Different Conflicts Shift

Write a note on different conflicts in shift reduce parser. With the help of syntax directed a"H;:" simple desk calculator, evaluate 'r the expression $(3+5/2)*(2+413)$ and draw the annotated parse tree

Rank 7

Asked 1 time

Years: 2024

Topic: Allocation

Write an SDD for a simple type declaration. With the SDD of simple type declaration, write the steps involved in the evaluation of inherited attributes for the statement given below. `int a,b,c` OR Write a note on stack allocation, heap allocation and static allocation strategies.

Topic: Process Synchronization

What are the different representations of three address code? Write the different, ** address code representations of the following expression. $(a+b)*(b+c)*(a+b+c)$ odule V - lg a) Explain any four principal sources of optimization. b) What is a basic block? Explain about the structure preserving transformations on. a basic block?
